

SELECT UNIFORMS

PRINTING AND WASHING GUIDELINES

Select uniforms are manufactured to the highest possible standards of quality using premium fabrics and trims. In order to maintain the appearance of these garments before and after wearing, we suggest you follow some simple guidelines:

WASHING INSTRUCTIONS

All Select uniforms have clear and specific wash care instructions attached to the garment. However, there are some simple guidelines you can follow to ensure your garment maintains its new look. Because dark and vivid color dyes can have slight color transfer in the initial wash, we recommend you:

- If possible, launder the uniforms before first wearing to minimize any minor migration of color. A cup of white vinegar will help further set the color.
- Always machine wash in COLD water, gentle cycle.
- Do not use bleach or detergents containing bleach.
- Wash separately.
- Line dry preferably, tumble dry low heat if not. Select fabrics are light and quick drying.

If you follow the above guidelines, your uniforms should maintain their appearance for the life of the garment.

THANKS FOR CHOOSING SELECT.
